### Management Tips:

- Ideally suited for variable soil yield environments.
- Not recommended for corn after corn.
- Short husk helps with drydown.

### Hybrid Placement Tips:

- Excellent early vigor for minimum tillage and early planting.
- Very good stalk strength for 103-day RM hybrid.
- Exceptional drydown to start harvest early.
- Long flex ears, great kernel depth and excellent test weight grain.

Always follow IRM, grain marketing and all other stewardship practices and pesticide label directions. Roundup Ready technology contain genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate. B.t. products may not yet be registered in all states.
